

Suffixes

A **suffix** is a group of letters which we add to the **end** of a word to make a new word.

For example: From the word **build** we get the two words **builder** and **building**.

Look carefully at the list of words below. Add **er** or **ing** to make new words.

1. farm
2. hunt
3. sing
4. help
5. read
6. sleep
7. clean
8. climb
9. garden
10. paint
11. teach
12. play

Remember that when you add **ing** to words that end in **e** you **miss out the final e**.

Add **ing** to the following words:

- | | | | | | |
|-------|------|------|-------|------|-------|
| skate | make | take | write | bake | dance |
| shake | ache | like | poke | rake | wake |

Write a sentence for each of the new words you have made.
